1. Rerik airfield is used by the Soviet forces and the Volkspolizei. All civilians have been moved out of the locality. A Volkspolizei anti-aircraft school is located at the field. In the future, training of parachutists and simultaneous training for sabotage and spy service will be given at Rerik. Expert engineer troops are being sent there as training instructors for parachutists. No Soviet pilots are trained by German instructors at Rerik; on the other hand, Soviet parachutists instruct the Volkspolizei in jumping technique. On 28 February 1952, a large number of Soviet jet fighters of the MiG type flew into the Rerik airfield. They left after four hours and flew off over the sea.
2. A number of old planes have been removed from the Peenemuende airfield. All MiG 15 planes have been sent to Pustitz-Dangarten. There is at present much flying activity at Peenemuende. On 27 February 1952, 32 planes were observed taking off between nine and four o'clock.
3. The big Dangarten airfield is fully occupied at the present time. Planes of all kinds stand on the field. The number cannot be definitely ascertained because some are in the hangars. There are at least seventy on the field. Construction work is going on all the time at the field.
